EXPERIENCE

AI Systems Evaluation Intern — AirDawgs Labs Jul 2026 – Aug 2026 (Online)

- Evaluated large language model (LLM) outputs against structured criteria for quality, factual accuracy, consistency, and reliability across diverse test scenarios, strengthening data-driven QA workflows.
- Designed and refined test prompts using systematic evaluation methods to identify model strengths, weaknesses, and failure patterns, generating insights used for model optimization.
- Documented evaluation findings in structured reports to support quality assurance and research initiatives, applying analytical rigor and clear technical communication.

PROJECTS

Sales Performance Dashboard | Power BI | GitHub Jan 2026 – Feb 2026

- Built an interactive Power BI dashboard analyzing 22,000+ orders to monitor KPIs, regional performance, and sales trends across multiple business dimensions.
- Applied time-series analysis and dynamic visualizations to surface seasonal trends, supporting data-driven strategic decision-making.

Music Store Database Analysis | SQL | GitHub Nov 2025 – Dec 2025

- Analyzed a relational music store database using SQL to evaluate sales performance, customer engagement, genre popularity, and artist revenue.
- Wrote complex queries using JOINs, GROUP BY, subqueries, and aggregate functions to extract structured, actionable insights from relational data.
- Identified customer purchasing patterns and top-performing tracks, translating raw records into business-relevant findings.
